Notes on Jay Cooke Descendant Chart

The construction of this chart is simple:

For each descendant it shows:

Full name

Year of birth

Year of death

If married:

Full name of spouse

Year of birth

Year of death

Year of marriage

The children of the marriage are then listed, indented one level, in order of birth.
And so on.

At the top of each page are generation numbers, starting with 1 for Jay Cooke. The latest born children are in generation 7, which makes them Great, Great, Great, Great Grandchildren of Cooke. Generation 7 children are fifth cousins to other generation 7 children with whom the only shared ancestor is Jay Cooke.

I have not listed every spouse of multiply-married descendants. Omitted are spouses that were not parents to Jay Cooke descendants. This was done solely for reasons of clarity. I hope this does not offend anyone.

I'm sorry my printing arrangement does not support a continuous scroll, but one can be fashioned by cutting and pasting. The result is a six foot long document.
